2017 Family Planning Conference
Breakout Session
September 20, 2017

Rachel Copeland, MDHHS
Debra Darling, Institute for Health Policy, MSU
Partnering with Medicaid Health Plans (MHPs)

- Learning Goals:
  - Describe MHP population health and quality improvement initiatives
  - Provide an overview of required performance improvement measures
  - Identify opportunities for collaboration
Michigan Comprehensive Health Care Program

- Managed Care since 1997
- New Medicaid Contract: January 2016
  - 11 Medicaid Health Plans
- Population health framework
- Focus on evidence and value-based care delivery models
- Service areas based on Prosperity Regions
MHP Population Health Initiatives

- Population Health Management Goal: To reduce racial/ethnic disparities
- Implement a program and other procedures to address social determinants of health and Health Equity
- Two Healthcare Effectiveness Data and Information Set (HEDIS) measures selected for disparity reduction:
  - Postpartum Care
  - Childhood Immunization Status – Combo 3
MHP Population Health Initiatives

• Chlamydia Screening
  o Largest racial/ethnic disparity of the Health Equity Project last three years

• Goal: To describe and implement programs/efforts to improve screening and treatment rates, and narrow health disparities
  o Target: Men ages 16-18 and women ages 16-24 years
  o Data analysis by race/ethnicity/gender
Chlamydia Screening Rates for Males and Females, Ages 16-18

Table 3. Geographic Disparities

Trends in Health Equity 2012-2015

Chlamydia Screening by Race/Ethnicity 2012–2015

- White
- African American
- Hispanic/Latino
- Michigan Medicaid All Managed Care Plans
- National Medicaid 50th Percentile
Community Collaboration Project

• Participation in MDHHS approved community-lead initiatives to improve population health in each service area region
• MHPs have identified some of the following social determinants of health: family, transportation, housing stability
MDHHS/MHP Quality Improvement Initiatives

- Emergency Department Utilization
  - Develop an in-depth understanding of ED utilization
  - Design interventions that move toward systematic approach to address complex issues impacting utilization
- Intervention focus: high-volume, high-risk, or problem-prone areas
- Goals: To improve health outcomes; enhance coordination of services; partner with non-traditional healthcare providers; increased cost-effectiveness
Integration of Behavioral Health

- Collaboration and integration between Medicaid Health Plans (MHPs) and Pre-paid Inpatient Health Plans (PIHPs)
- Joint care management processes
- Shared performance metrics
  - Follow-up after Hospitalization for Mental Health Illness within 30 days
MHP Performance Measures

- Women’s Health:
  - Breast Cancer Screening
  - Cervical Cancer Screening
  - Chlamydia Screening
  - Prenatal Care
  - Postpartum Care
  - Low Birth Weight
  - Low-Risk Cesarean Section
  - Adolescent Immunizations
  - Smoking Cessation Strategies: Medical Assistance with Smoking and Tobacco Use (Consumer Assessment of Healthcare Providers and Systems-CAHPS)
Post-Partum Care, By Race/Ethnicity
Michigan Medicaid All Managed Care Plans
HEDIS 2015

Percentage

Race/Ethnicity

- AI/AN (n = 91)
- Asian/NH/OPI (n = 384)
- AA (n = 10460)
- Hispanic Other (n = 1580)
- Multiracial (n = 51)
- White (n = 19465)
- All Plan (n = 33342)

- 51.6%
- 64.3%
- 48.2%
- 63.2%
- 54.9%
- 61.6%
- 57.4%
Other Performance Measures

- Childhood Immunizations
- Well-Child and Adolescent Well Care Visits
- Access to Primary Care Visits
- Chronic Conditions (Diabetes & Asthma)
- Child and Adult BMI
- Blood Lead
CMS Measuring Contraception Use in Medicaid and CHIP

- In July 2014, Center for Medicaid and CHIP Services (CMCS) launched the Maternal and Infant Health Initiative, in collaboration with states to:
  - Increase the rate and content of postpartum visits
  - Increase the use of effective methods of contraception
  - Supports collection and reporting of data to CMCS on a developmental quality measure
  - Measure assesses progress on the goal to increase the use of effective methods of contraception
Michigan’s Initiative

- Assessment of MHP Family Planning Services
- Survey of primary care and OB/GYN provider regarding reproductive counseling and Long-Acting Reversible Contraception (LARCs) - Pending
- Pilot in 3-4 practices related to reproductive health counseling

Suggested Collaboration/Partnership

- Population Health
- Community Collaboration
- Health Equity
  - Low Birth Weight (LBW) by prosperity region
- Performance Measurement
- Other:
  - MHP Performance Improvement Project (PIP): Timeliness of Prenatal Care
